

Xchange Network

The Power to Manage Your Business Communications More Effectively.

Our technology, an "out of the box" collaboration solution, seamlessly integrates with Outlook[®], Entourage[®], iCAL and Address Book and Evolution[®] desktop applications. No additional software configuration or training is necessary.

Xchange Network's revolutionary collaboration solution supports Microsoft Outlook, Microsoft Entourage, OS X iCAL and Address Book and Ximian Evolution across Windows, Apple OS X and Linux server environments.

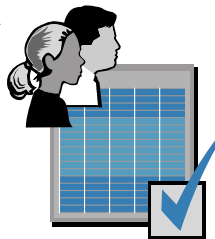

Data when you need it... It doesn't get easier or more convenient than Xchange Network.

Xchange Network

offers two innovative solutions geared specifically for companies that have a need to communicate and exchange information efficiently:

► XC Connect[™],

enables users to easily share personal and public Calendar, Contact and Task items between and across Outlook, Entourage, iCAL and Address Book and/or Ximian Evolution (e.g, Outlook to Outlook, Outlook to Entourage or Outlook to Evolution).

► XC Vault[™],

a permissions based file storage and sharing solution - flexible and accessible from any browser or Windows Explorer[®] Web Folder.

These two cutting edge solutions provide you with the ability to:

- Update, share and manage customer/client contact information with teams,
- Assign and manage group tasks and
- Share any electronic file without burdensome email attachments or the hassles of an FTP site, regardless of the user's location.

Efficient communication is a key to achieving success in a rapidly changing business environment. Xchange Network's leading edge solutions provide powerful, easy-to-use group collaboration and file management capabilities, by removing cumbersome communication barriers. Get the job done-quicker, more efficiently and with less expense.

Supported on Windows, Apple OS X and Linux Servers

- Schedule meetings and appointments with team members, regardless of location around the globe,

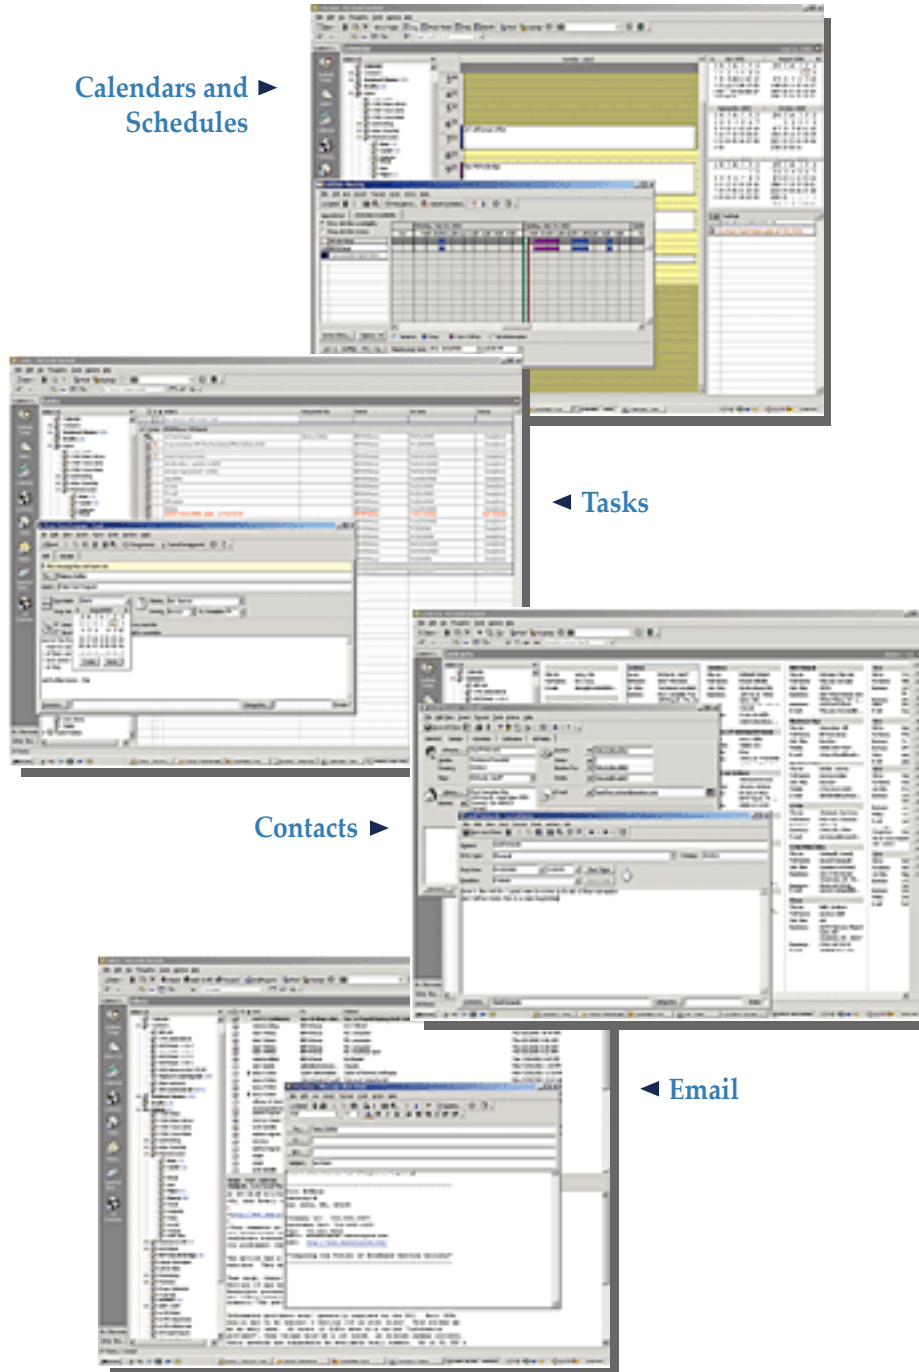

XC Connect™ and XC Vault™ -

Xchange Network understands the growing demands on businesses to maintain a competitive edge in today's fast-paced market.

That's why we offer two software products that provide businesses advanced communication solutions at the click of a mouse.

Microsoft Outlook Example

XC Connect

An alternative to Microsoft Exchange®, XC Connect is a robust communication solution that scales from small to large businesses and seamlessly integrates with Microsoft Outlook, Ximian Evolution and Microsoft Entourage.

XC Connect makes group collaboration easier than ever before. If you are using Microsoft Outlook, Microsoft Entourage, OS X iCAL and Address Book and/or Ximian Evolution you now have the ability to communicate collectively using the application you are already familiar with:

Calendars and Schedules -

- Share your Calendar with your business team members
- Check free/busy availability of other team members and schedule meetings
- Create and manage group Calendars

Tasks -

- Schedule and track group Tasks

Contacts -

- Create individual and group contact lists
- Share and manage group Contact folders

Email -

- Compatibility with any email server (dedicated company server or ISP)
- Support users across single or multiple email domains (e.g., name@yourcompany.com and othname@hotmail.com)

XC Connect provides businesses with the ability to share information - without the overhead of dedicated servers, high license fees, or complex administration.

XC Vault

XC Vault offers a secure electronic storage facility to organize, store and retrieve documents. This browser based file management application allows files (documents, data, code, etc.) to be retrieved and managed through a "check in/check out" system.

XC Vault enables you to share files with other team members 24/7 regardless of geographic location.

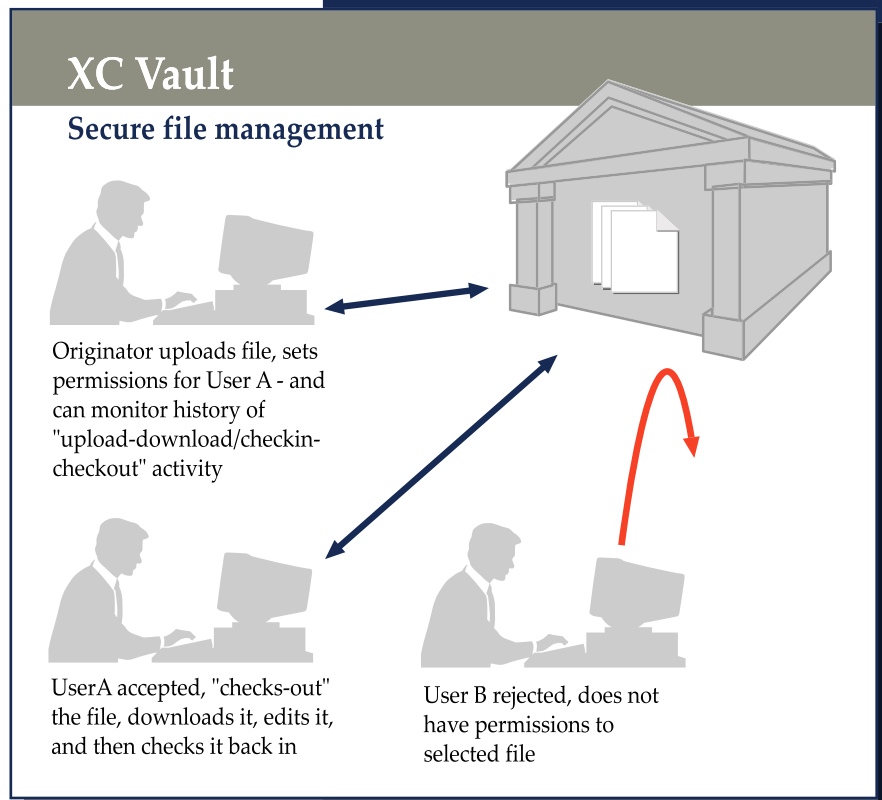

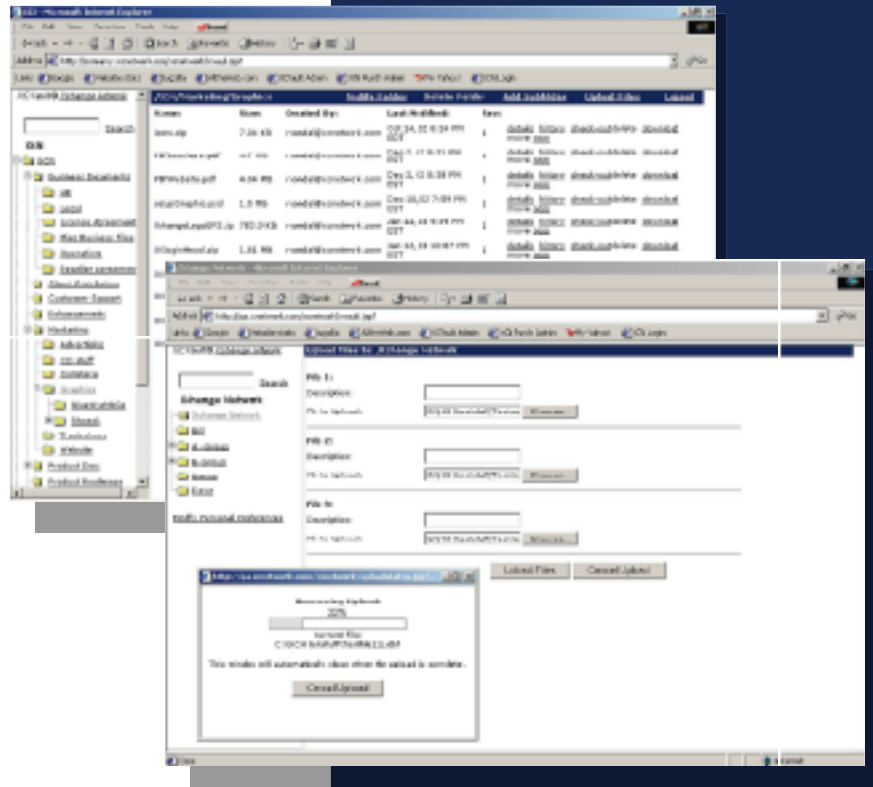

More importantly, XC Vault allows you to manage files without having to log into your company's network, providing "anytime, anyplace" accessibility.

With XC Vault you will be able to:

- Post and access electronic files
- Open or save files directly to/from applications
- Browser or Web Folder access
- Drag and drop files and folders
- Check documents in and out
- View file history
- Create and modify folders
- Search for files
- Set user permissions

With its comprehensive permissions model, both the administrator and the file owner can set and manage viewing and downloading permissions. ▶

By managing files from one location, XC Vault will help keep your team on the same page at all times.

System Requirements

Server:

- Microsoft Windows, OS X 10 and Linux (Redhat, Debian, Mandrake, etc.).3

The Virtual Office

Part of doing business today is the ability to make choices at different times from different places in order to better service customers.

Xchange Network has the answer. Not only will our products enhance communication for your traditional office, but they will also enhance communication for your virtual office.

With both XC Connect and XC Vault, remote access to business information is a cinch, allowing you and your staff to make choices anytime, anywhere...

A SMART CHOICE

We saved the best for last.

Pricing: Compared to other enterprise solutions, our innovative software products are offered at a very cost-effective price. Our pricing is based on the number of users - regardless of the number of actual computers you install the software on.

Ease of use: XC Connect and XC Vault are designed to enable extremely simple installation and administration - no system administrator resources required!

To learn more about XC Connect or XC Vault, contact an Xchange Network Account Representative via email at: sales@xcnetwork.com or, by phone: 734-913-5810

or visit us on the web at www.xcnetwork.com to download and purchase.

We will be glad to answer any questions you may have.

We look forward to hearing from you!
