

XC Vault™ Product Profile

XC Vault's on-demand virtual data room enables you to streamline projects and maximize operational efficiencies.

Incredibly secure and easy to use, XC Vault enables electronic files to be easily uploaded, shared or retrieved with users and/or groups according to their designated permission level.

- XC Vault simplifies business processes (i.e., file and document sharing, M&A due diligence, workgroup management, etc.).
- New users, groups and/or deals can be added to XC Vault in seconds without additional IT or 3rd party costs.
- XC Vault functions as "shared-drive" enabling files to be stored indefinitely (with full-backup capability) and accessible by users.
- XC Vault is a permissions-based data room solution, enabling electronic files to be easily uploaded and shared with specific users and/or groups.
- XC Vault functions similar to an FTP Site, allowing the creation of temporary users to have "restricted" permissions to specific files, yet providing the folder administrator with data regarding download activity.
- More importantly, XC Vault is versatile, providing flexible and easy administration of users and folders.

Anytime anywhere access – 24/7

Access to XC Vault is accomplished either via a standard Internet browser, such as:

- Microsoft Internet Explorer
- Firefox
- Safari, etc.

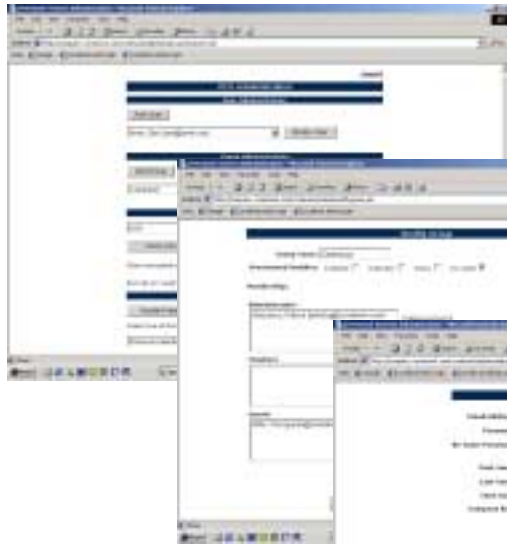

or via WebDav using:

- Windows Explorer on PC desktops or
- Finder on Macs

XC Vault does not require any client-based component. This means that you can access files from *any* computer that is connected to the Internet and has access to your server, at any time, regardless of location.

Simple System Administration

Folders and Users are administrated through an Administrative screen, also accessible via a browser screen, from any computer with access to the XCN Server. Group Folders and Users can be created and user permissions to the folders granted. Users may be assigned different permissions to different folder, providing tremendous flexibility and utility.

Single page provides access User and Group (folder) administration.

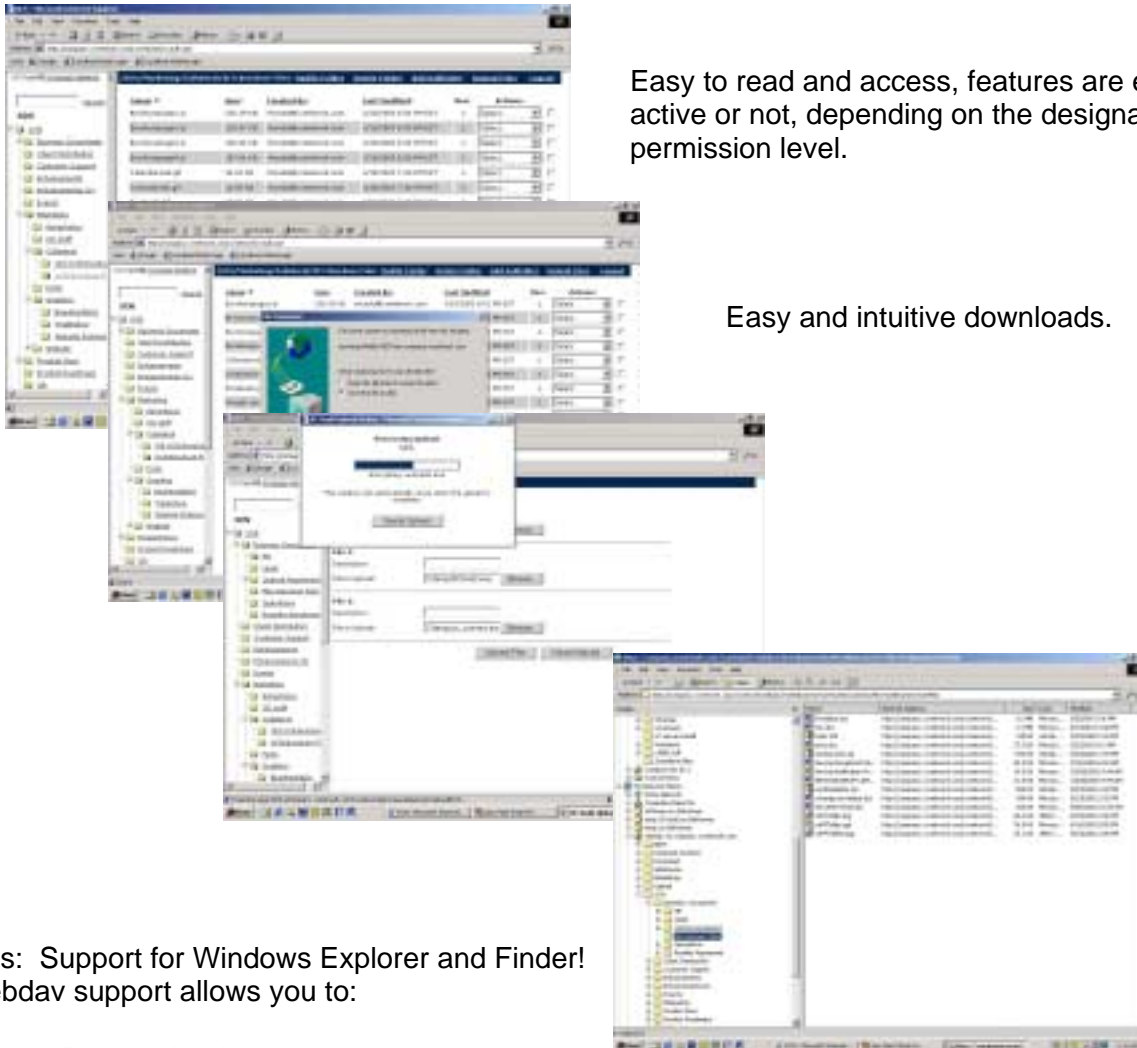

Simple folder administration (establishing user permissions to the folder).

Straightforward user administration (user name, password).

Features

XC Vault enables authenticated users, depending on the level of permission that they are granted:

- SSL data transmission encryption
- 3 tier permission model
- Drag-n-drop WebDAV functionality (i.e. , Windows Explorer or Finder)
- Private labeling (available in November)
- Check-out/check-in notification
- Delete files
- Move files
- File history reporting (who downloaded, uploaded, modified, renamed or moved a file and the action occurred)
- Create or delete sub-folders

Easy to read and access, features are either active or not, depending on the designated permission level.

Easy and intuitive downloads.

Plus: Support for Windows Explorer and Finder!
Webdav support allows you to:

- Drag-n-drop'
- open
- save
- rename, and
- delete

files from your desktop using Windows Explorer on your PC or Finder on your Mac!

Permissions Model

The Permissions Model allows four levels of access:

	View	Upload/ Download	Download	Create Folder	Modify folder	Move Files	Delete Any File	Delete Own Files
Admin	All folders an Admin of	x	x	x	x	x	x	x
Member	All folders a Member of, including "company" folder	x	x	x		x		x
Guest	All folders a Guest of, including "company" folder	Own folder only	x					
Restricted	Only those folders a Restricted member of		x					

Admin – users have visibility into the “company” folders, folders for which they have been assigned “Admin” privileges, and their own folder. They have full authority to upload, download, create and/or modify folders, and move documents.

Member – users have visibility into the “company” folders, folders for which they have been assigned “Member” privileges, and their own folder. They ability to download, upload and move files they have created member and to add sub folders to those folders it is a member of. However, they are not able to: 1) delete or move files uploaded by other users or 2) not able to delete folders.

Guest – users have visibility into the “company” folders, folders for which they have been assigned “Member” privileges, and their own folder. The guest is not allowed to delete files or folders except from their own folder.

Restricted – users only have visibility of those folders for which they have been granted permission to. Restricted users do not have visibility into the “company” folders and may not delete files or folders.

XCHANGE NETWORK

Simplifying Business Collaboration...

XC Vault is Server Based

XC Vault is installed on a computer that you designate as the XC Vault “server”. You may install XC Vault on almost any computer that is in your network.

Minimum requirements are that it be:

- 133 MHz or higher Pentium-compatible CPU (the higher the MHz, the quicker it will process requests)
- 256 MB of RAM
- 100 MB of free disk space
- Microsoft Windows Vista/XP/2003 Server/2000/, Linux (Redhat, Debian, Mandrake, etc.), and Mac OS X 10.x systems
- Access to your network (and the Internet, should you desire access from outside your internal network)

Other “Cool” Features

- URL Links to a specified file – you can add a link to web pages, emails, MS Office documents that will open a file in XC Vault. This will allow users to simply click on the link and take whatever action is required on that file (download, move, check-out, etc.) - This means that you don’t have to attach a file to an email – simply copy the URL link to that file into the email and the recipient can then retrieve the file when convenient.
- File Search – you can search for files in the same manner as you would with any other file search tool.
- File Sorting – you can sort files according to their Name, Size, Created By, and Last Modified Date.
- SSL Certificate support –you can ensure secure file transfer using a host based SSL Certificate (unsigned) or one that you own.
- Web Folders - This allows drag and drop, opening, editing and saving a file from any desktop application to your XC Vault Web Folder directly.
- Clean user interface, easy to read and easy to use.

And we have additional functionality coming!

To Order or Evaluate XC Vault

To order or to get a free 30 day trial of XC Vault, go to www.xcnetwork.com and select the appropriate tab (Try Now or Buy Now). Pricing is available on the “Buy Now” tab.

XCHANGE NETWORK

Simplifying Business Collaboration...
